

多效式蒸餾水機

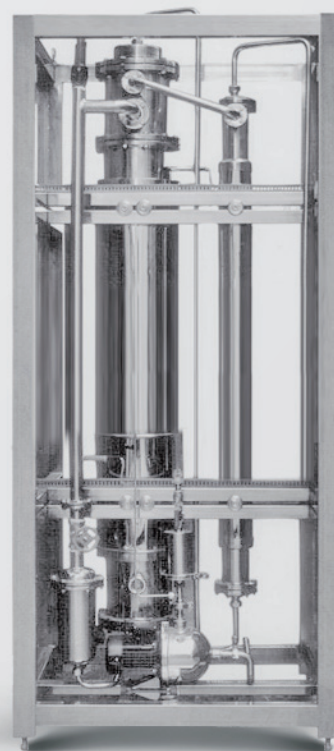

MULTI-FUNCTION WATER DISTILLER

特點 +

1. 衛生焊接等級：內外拋光為0.1 - 0.2Ra 以上。
2. 水/蒸氣分離設計：降低蒸餾水污染。
3. 可使用蒸餾水及純水。
4. 注水接觸面為不鏽鋼SUS316L 等級。
5. 蒸餾溫度可達100°C 以上，可防止細菌產生。
6. 所有的設計均符合世界安全壓力容器標準。
7. 本設備設計主要以符合 FDA 注射劑用水 (WFI)之規範。
8. 依照供給水之來源水質及不同之效應數,使蒸餾液水質可達注射液之標準。

FEATURE +

1. Sanitary welding grade: polishing inner and outer for above 0.1 – 0.2 Ra polish.
2. Water/vapor separable design to prevent non-qualified vapor to contaminate the distilled water
3. Distilled water and pure water can be used.
4. Machine contacting feed-water part all using SUS 316L stainless steel ,320~400# grit polish.
5. Double tube sheet design, free from cooling water contamination into distillations by glass fiber.

純蒸氣產生機

6. The distillate temperature is over 80°C to avoid bacteria growing.
7. All designs are according to the world safety pressure vessel standard.
8. This still designed to meet to FDA specification of Water For Injection.
