+

原理介紹 +

- 利用刀片快速旋轉，將原料打碎成或切碎成比沖孔網更小之顆粒。
- **速度**：可依不同材料而選擇不同速度。
- **沖孔網**：依不同用途選擇不同孔徑。

適用產業 +

適用用於西藥製劑、中藥製劑、健康食品、生物科技...等。

功能 +

- **粉碎**：將較粗之原料粉碎為細顆粒或粉末。
- **整粒**：將較大且不規則顆粒，整粒成較小且均勻之顆粒。

特點 +

- 特殊設計冷卻軸承之適合高速使用。
- 破碎刀以特殊不銹鋼製成，刀刃不易磨損。
- 附安全裝置，防止操作中受傷。
- 可配合真空送料裝置連線。

THEORY +

- Using high speed rotating blades to crush or grind raw materials to a desired size which is smaller than the perforated plate screen.
- Speed is adjustable to suit different material.
- Perforated plate screen: mesh size can be selected to meet the processing requirements.

FUNCTION +

- **Crushing**: crush raw material into small granule or powder.
- **Milling**: process larger and irregular granules into smaller and even size.

FEATURE +

- Special bearing cooling system : for high-speed operation that prevents the high heat damaging the product .
- Suitable for dry and wet granules.
- The safety device will prevent the operator to get hurts.
- Discharge system : the vacuum suction device will be available to eliminate dust contamination. (Optional)
