

# 酒精蒸餾塔

## ALCOHOL DISTILLER TOWER

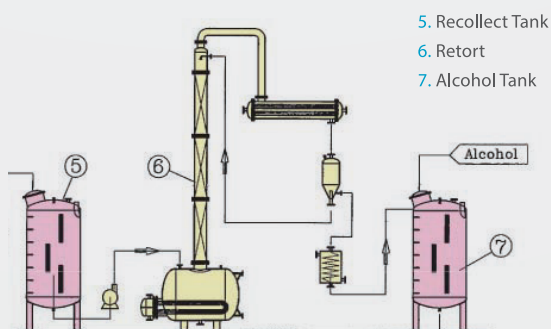

### 特點 +

1. 蒸餾塔回收酒精再利用，降低成本，兼可做環保。
2. 可用於食用或飲料用酒精的蒸餾，亦可用於酒精生質能源的蒸餾，以提高酒精濃度，降低水含量。
3. 利用沸點較高的物質以液體狀態於塔底排出，以達到混合物物質分離的效果。

### APPLICATION +

1. This equipment divides into intermission and continuous type. It is consist of distilling kettle, distilling tower body, condenser, buffer tank, flowmeter.
2. Alcohol be recovered and used again by distiller, can reduce cost and protect environment.
3. Continuous type with a pre-heater can be carried out continuous production line with high-volume production needs.
4. It can distill the weak alcohol which purity is lower than 30% purify to 90-95% and the surplus residue alcohol purity 3%.
5. To be equipped with PLC control system and control the parameter of temperature, flux, purity to enhance the production efficiency automatically.

### 規格表 | SPECIFICATION

蒸餾型號 Distillation Type	產量 Capacity (L / HR)
YS-AR-30	20-30
YS-AR-100	80-100
YS-AR-200	160-200
YS-AR-500	400-500
YS-AR-800	700-800
YS-AR-1000	800-1000
